Yes

No

How did you hear about us?

Medical History

Are you currently taking any medications?

Yes

No

If yes, please explain:

Do you have any allergies?

Yes

No

If yes, please explain:

Do you have sensitive teeth?

Yes

No

I authorize the technician to apply a tooth gem with dental adhesive to the following tooth/teeth (check all that apply):

By signing below, I agree to the following:

I have completed this form to the best of my ability and knowledge. I agree to inform the technician of any changes in the above information. I agree that I do not have any condition(s) that would make the requested treatment unsuitable. I will inform the technician of any discomfort I may experience at any time during my treatment to allow them to adjust accordingly. I agree to waive all liability toward my technician for any injury or damages incurred due to any misrepresentation of my health.

Informed Consent for Tooth Gems

_____ I have voluntarily elected to undergo the tooth gem application procedure after the nature and purpose of this treatment have been explained to me.

_____ I understand and acknowledge that there are risks involved with the treatment I will be receiving. Although it is impossible to list every potential risk and complication, I have been informed of possible benefits, risks, and complications, and I have had the opportunity to ask questions regarding these risks and other possible complications

_____ I understand that tooth gems must be placed on a real and flat tooth.

_____ I understand that a tooth that is false, crowned, or capped is not a good candidate for a tooth gem because the glue will not adhere to a false tooth.

_____ I understand that the tooth gem must be placed high on the tooth, or in the center because the low part of the tooth is what sinks into food when biting.

_____ I understand that once the tooth gem has adhered, there may be some dental adhesive surrounding the tooth gem on the tooth. I understand that this will wear off within a couple of weeks from normal brushing and eating.

_____ I understand that tooth gems can last between four months to a year and are not meant to be permanent.

_____ I understand that I should not try to remove my tooth gem myself and should have it professionally removed by a dental professional.

_____ I understand that when my tooth gem falls off naturally, there may still be residual adhesive left on my tooth.

_____ I understand that if I get my teeth whitened or use whitening strips, the area under my tooth gem will not receive the whitening treatment while the tooth gem is on.

_____ I understand that any aftercare of the tooth gem will be done by my dental professional.

_____ I have, to the best of my knowledge, given an accurate account of my medical history, including all known allergies or prescription drugs or products I am currently ingesting or using topically.

By signing below, I agree that I have read and fully understand this agreement and all information detailed above. I understand the procedure and accept the risks. I agree I will assume the risk and full responsibility for any and all injuries, losses, side effects, or damages that might occur to me while I am undergoing this procedure. I do not hold the technician, whose signature appears below, responsible for any of my conditions that were present, but not disclosed at the time of this procedure, which may be affected by the treatment performed today.

Tooth Gem Aftercare Instructions

- Do not eat or chew gum for one hour after the tooth gem is placed.
- For the next 12 hours following the placement of your tooth gem:
 - Do not brush your teeth
 - Do not eat hard food
 - Do not consume acidic drinks
 - Do not use an electric toothbrush for 48 hours after the tooth gem is placed
 - Do not touch or play with the gem with your tongue or finger
- Once the adhesive is set, maintain regular dental hygiene like brushing and flossing your teeth
- Keep teeth clean to avoid plaque buildup around the gem
